## Supplies

- Watering Can
- Crystals chandelier, craft, acrylic, any type
- Floral Wire
- Micro Pliers
- Any type of bead 1

## Instructions

1. Remove the rim from the spout. Work slowly as it may be tight depending on the age of your can.
2. String crystals onto a piece of wire and thread the ends into the spout holes.
3. From the inside of the spout, run a bead as it won't be visible, onto the wire and twist and wrap to hold the wire inside the spout. Then simply reattach the rim of the spout head to the can by crimping the edges with pliers.
